Experience

EverQuote, Inc
Director of UX Engineering

2013 – Present
Cambridge, MA

Previously:

- **Technical Lead, UX**
- **Web Designer & Front-End Developer**

Jan 2015 – Aug 2017
2013 – Jan 2015

Managing and developing alongside the team of engineers responsible for building and maintaining the user experience across EverQuote's range of consumer-facing, business-facing, and internal applications. Responsible for code review, establishment and maintenance of code quality standards, project planning and execution, and working closely with other teams and company leadership to build full-stack implementations for short-term and long-term business opportunities.

Millennium Partners Sports Club Management, LLC
Online Marketing Designer & Developer

2009 – 2013
Boston, MA

Sole in-house developer and digital designer, working in collaboration with print designer. Designing, developing, and sending thousands of emails per week to club members, employees, and prospects, in addition to developing, maintaining and improving web pages and web applications in PHP and HTML. Creating and maintaining MySQL-backed web applications for a number of purposes including member communications and class scheduling. Also involved in video production and other design and marketing efforts.

Education

Emerson College
MA, Global Marketing Communication & Advertising

2009
Boston, MA

Savannah College of Art & Design
BFA, Animation

2007
Savannah, GA

Skills

Languages: Proficient in Ruby, Node.js, PHP, MySQL, Postgres, HTML (HAML, Pug, Slim), CSS (SASS), ES5/ES6+ (Babel), and shell. Experience with Swift, LESS, and MongoDB.

Frameworks and Libraries: Proficient in Ruby on Rails, Webpack, React/JSX, Redux, Sequelize, jQuery, Wordpress, Express.js and Sinatra. Experience with Backbone.js and Meteor.

Software: Proficient in Adobe Creative Cloud suite, Sketch, Windows and Mac environments. Develop in Visual Studio Code, RubyMine, and Xcode for Swift. Office suites are no problem. Use vim when handy, but no hjkl – arrow keys exist for a reason.
